Jan 56

NOTE: There is one other aspect  
of this whole situation which  
is not an OSI job, but is of  
CIA interest because it is of  
interest to national security.  
That is:

The mass flying, since CIO  
reports could be

- (a) produce mass hysteria
- (b) give our location  
radar warning system
- (c) overload communication  
facilities.

Approved for Release

2/20/10
